PROFILE

I am an Industrial Engineer pursuing a Master's degree in Process and Material Engineering at Trieste University. My journey into programming began with self-learning, mastering HTML, CSS, and JavaScript. As I dug into front-end development, getting the hang of React and Bootstrap was a key part, making me better at creating dynamic and responsive web applications.

Enrolling in a Reindal programming course expanded my knowledge, culminating in an internship. Where i am currently working towards becoming a full-stack developer, I am gaining practical experience in a real-world software environment. I am an intelligent, disciplined, and responsible individual with a strong motivation for learning and a natural curiosity that drives my continuous pursuit of knowledge.

EMPLOYMENT

FRONT-END DEVELOPER/intershipe

Nov 2023 - Present

REINDAL, Reggio nell'Emilia

- Proficiently worked with SVELTE framework to enhance and create new components.
- Created API calls to both local servers and Microsoft Azure servers
- Collaborated closely with the backend team to identify and communicate issues, fostering a collaborative development environment.
- Worked on improving app responsiveness, ensuring a seamless user experience across different screen sizes.
- Actively participated in team meetings to discuss and solve complex problems related to project development.
- Collaborated with team members to identify innovative solutions, contributing to a more effective problem-solving process.
- Utilized POSTMAN for API testing, creating organized collections for efficient testing processes.
